

Connecting with Student Campus Media

Hi [EDITOR/REPORTER],

I'm [NAME], a Student Builder Group Leader for the AWS Student Builder Group at [UNIVERSITY NAME]. We're a student-run community where members can learn and explore cloud and AI technology, build real projects, and connect with a global network of builders and developers. Our chapter is part of a program spanning 600+ campuses worldwide.

We have [EVENT/ACTIVATION] coming up, and we think it could make a great story. Our community is proof that students don't just want to learn about technology... they want to build with it. We've created something real here on campus, and we think your readers would love to hear about it.

If you'd like to attend the event, see what we're building, or grab a quick interview with some of our members, we'd love to make that happen. Feel free to reach out at [EMAIL] or connect with us on [SOCIAL].

Hope to see you there!

Best,

[NAME]
