

Let's build a Tic Tac Toe Game with Kiro

Speaker Name (pronouns)

Title / Company

Let's get to know each other!

How many of you have built software before?

How many of you have used AI coding assistants before?

How many of you have heard of Kiro before?

Kiro

Kiro is an agentic AI with an IDE, CLI, and web interface that helps you go from prototype to production.

Tic Tac Toe game?

Isn't it too easy?

What will we learn with Tic Tac Toe game?

- Going from idea to app
- Building a beautiful UI (our imagination is our limit!)
- Building a backend for the app
- Deploying the application

What will it look like?

- Customizable board
- Crosses and circles
- 2 parties playing each other
- Solving logical problem
- Allowing different strategies
- Win condition needs to be satisfied
- Having an option to select symbols (more than O and X)
- Two teams can play together
- CPU difficulty levels
- Single and multiplayer
- Leader boards
- History and more metrics
